

Rapid International LED Upgrade by Resourceable

RAPID INTERNATIONAL REAPS BENEFITS FROM NEW LED LIGHTING PROJECT

Rapid International is a global leader in the manufacturing of equipment for the concrete, construction and environmental industries. Established in 1969 and now led by MD Mark Lappin, Rapid has a presence in more than twenty countries worldwide and is a trusted partner to a wide variety of customers, ranging from multinational construction groups to small concrete producers. Rapid is always at the cutting edge of design.

When it came to upgrading lighting at their 50,000 sq. ft. factory in N. Ireland, Rapid chose Resourceable Ltd., a specialist in lighting, energy and automation. Resourceable provides turnkey solutions, offering clients comprehensive lighting surveys, designs,

supply and installation; delivering outstanding projects on time every time.

Resourceable has enviable relationships with leading U.K., USA and European lighting manufacturers. Customers can therefore be assured that they are getting high quality luminaires that match their budget and lighting needs.

Sean O’Kane of Resourceable commented: “ We are recognised as a ‘safe pair of hands’ for lighting and energy projects; we exceed expectations and our clients don’t hesitate to recommend us. Customers need a supplier that they can trust and we are delighted that our customers consistently recommend us to others.”

“ *Resourceable did a fantastic job from start to finish. Our lighting is greatly improved and running costs are reduced.*

Professional work and high standards; I would strongly recommend them.”
